INTRODUCTION

Tata Coin aims to make decentralized finance completely secure and to provide the most secure payment system to multinational companies and organizations, including investors, around the world, allowing them to easily and securely transact digital transactions using blockchain technology and be able to own their valuable assets.

Tata Coin is a fully Community-Driven Decentralized Cryptocurrency based on the goal that it will be the safest Global Digital Currency in the world and will be used worldwide as a payment method. A Digital Currency that will not be owned or controlled by any individual, organization, entity, or group, and Tata Coin has been made 100% Community driven. Tata Coin has been launched as the world's first Digital Currency owned by 'You'.

PROBLEMS AND SOLUTIONS

Risk in Cryptocurrencies

There are many risks involved in other cryptocurrencies. We understand this and have the skills, experience, and leadership to overcome them.

SMART CONTRACT

While there are many functions in the smart contract code of many other Cryptocurrencies that allow the owners of cryptocurrencies to own valuable assets of the common people and to the detriment of investors, on the other hand in Tata Coin Various important steps have been taken to make it 100% safe from such errors.

Not only Tata Coin's smart contract is audited, but all the functions in Tata Coin's contract are designed to make Tata Coin 100% the most secure digital currency, and Decentralized finance has been made 100% secure for the people.

While keeping this in mind, the ownership of Tata Coin's smart contract, which is deployed to the Binance Smart Chain, has been renounced so that no one can change its functions in the future. In other words, no individual, organization, entity, or group in the world is going to control Tata Coin and neither will it.

THE TEAM

Tata Coin doesn't have a CEO, nor is it controlled by any individual, organization, entity, or group, but Tata Coin is the first Digital Currency in the world to be owned by the community, i.e. its holders. The people in the community are the ones who are going to control it, that is, all the investors who have bought and held the Tata Coin are the real Tata Coin team. This door is open for every investor that he can invest in the Tata Coin and can count himself as the owner and team in this project.

WHY AND HOW DOES THE COMMUNITY OWN THE TATA COIN?

Further clarification regarding the Tata Coin team

There are many risks involved in other cryptocurrencies. We understand this and have the skills, experience, and leadership to overcome them.

The basic and important role of any cryptocurrency is its supply; the one who has the most supply of the Cryptocurrency is the real owner of the Cryptocurrency.

It is not necessary that the person or group who has developed or launched a cryptocurrency is the owner of it, but the real owners of any cryptocurrency are only the people who have a huge amount of supply. Because the one, who has the most supply, actually owns the assets of all the investors in the liquidity pool, he can seize people's assets by selling his supply if he wants.

Whenever an investor buys any cryptocurrency, his asset goes into the liquidity pool and in return, the buyer is given cryptocurrency coins and according to the principle of demand and supply that is why the value of coins also increases. On the other hand, if someone sells cryptocurrency, the coins sold go back to the liquidity pool and in return, the seller gets the assets back from the liquidity pool. That is, all the assets of the buyers of cryptocurrency go to the liquidity pool and the one who has the most supply is the owner of the assets in this liquidity pool and he is the one who controls the price of the cryptocurrency. This is a very important issue and only Tata Coin presented a solution to this problem.

Tata Coin has a supply of 9 million which cannot be increased and 100% of its supply is owned by no one but the community.

That is, only investors own the assets in the liquidity pool. Apart from investors, no one has a supply of Tata Coins.

That is why Tata Coin has no owner other than the investors. Tata Coin is a 100% community-driven Digital Currency because the entire supply of Tata Coin is in the hands of the Community, the Developers of Tata Coin have 0% supply of Tata Coin. Tata Coin does not have a developer's wallet that has supplies.

This is the main reason that makes Tata Coin unique and secure from all other cryptocurrencies. Even Tata Coin is more secure than Bitcoin.

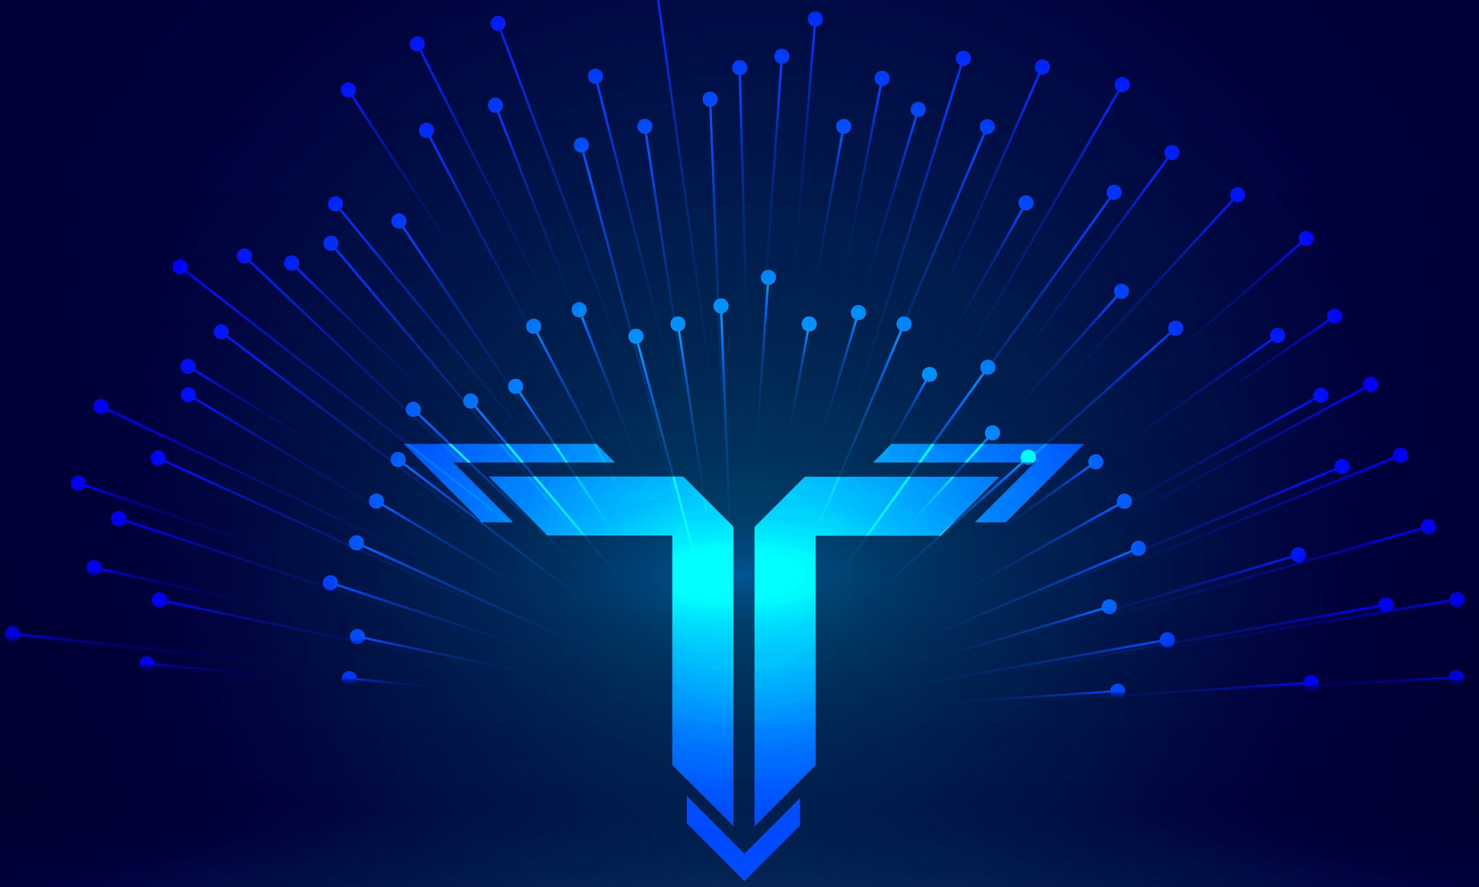

Every holder is an owner of the TATA Coin and you can post your full details including your name, photo, and Social Media profiles on the Official Website of Tata Coin. To update your profile please visit the official website for more details and follow the instructions given in the team section.

LIQUIDITY

Investors are the sole owners of the assets in the liquidity pool, to make Tata Coin a 100% secure digital currency and to protect investors' assets, Tata Coin's liquidity-pool tokens have been locked forever. Visit Tata Coin's website to see the details of the locker.

Tata Coin has made it ensured that not only is Tata Coin the world's first secure Digital Payment System (DPS) but it is also 100% completely risk-free.

We are being proud to present and to introduce Tata Coin to the whole world.

GET STARTED WITH TATA COIN

A global, open alternative to the current financial system

TATA Coin brings sound money to the world, Merchants and users are empowered with low fees. The future shines brightly with unrestricted growth, global adoption, permissionless innovation, and decentralized development.

TATA Coin uses peer-to-peer technology to operate with no central authority or banks; managing transactions and the issuing of TATA Coin is carried out collectively by the network (Blockchain). TATA Coin is open-source; its design is public, nobody owns or controls TATA Coin and everyone can take part. Through many of its unique properties, TATA Coin allows exciting uses that could not be covered by any previous payment system.

WORKS EVERYWHERE, ANYTIME

Similarly to email, you don't need to ask recipients you're sending TATA Coin to, you just need their TATA Coin BEP-20 wallet address and then you can transact with them anytime. The TATA Coin network is always running and never sleeps, even on weekends and holidays.

OPEN TO ANYONE

Nobody controls or owns TATA Coin. There's no CEO, and you don't need to ask for permission to use it.

FAST INTERNATIONAL PAYMENTS

Sending TATA Coin across borders is as easy as sending them across the street. There are no banks to make you wait three business days, no extra fees for making an international transfer, and no special limitations on the minimum or maximum amount you can send. Like the Internet itself, the network is always on. No transaction is too big or too small. And you never need anyone's permission or approval.

BE YOUR OWN BANK AND HAVE FULL CONTROL OVER YOUR MONEY

Banks can make mistakes, hold funds, freeze accounts, and otherwise prevent you from accessing your own money.

Banks can also decide to block your transactions, charge you fees, or close your account without warning. TATA Coin gives you full, sovereign control over your funds, which you can access from anywhere in the world.

A SCARCE DIGITAL CURRENCY WITH A KNOWN, FIXED SUPPLY

The TATA Coin protocol ensures there will never be more than 9 million coins in existence. Governments constantly print money out of thin air, endlessly inflating the supply and devaluing everyone's savings. TATA Coin has a fixed supply and therefore represents sound money.

TRANSPARENT

All transactions are recorded on a global public ledger called the blockchain. The ledger is updated at regular intervals in blocks that are connected to form a chain. This allows anyone to easily see the full history of ownership and helps to eliminate the potential for fraud.

PSEUDONYMOUS

Identities are not tied to transactions. This helps to ensure that TATA Coin remains free to be used by anyone, without censorship.

WHY CHOOSE TATA COIN

Our mission is to amplify your Defi experience

The Tata Coin is being launched under the same plan that it will be the first most secure digital currency in the world, which will be used by people from all over the world, for individual and commercial purposes. In which investors or various trading entities, Multinational Companies and Organizations, etc. will use Tata Coin as a secure payment system.

Special care has been taken to make Tata Coin 100% secure in every way. Its security features make it unique from other Cryptocurrencies, even Bitcoin is way below Tata Coin in terms of security.

The security features of Tata Coin make it a 100% Decentralized and secure payment system.

TATA COIN'S CORE FEATURES

Security is Paramount

Fully Community Driven & Decentralized Infrastructure

TATA Coin's is a fully decentralized peer-to-peer electronic system that does not rely on any central authority like a government or financial institution. As such, it represents a fundamental redesign of the very nature of money.

Minimal & Non-Mintable Supply

Only 9 million coins will ever be created. This makes TATA Coin a hard asset, like land or gold, providing an opportunity for people to store value in the digital realm over long periods of time.

Ownership Renounced

The Smart Contract has been renounced so that no one can change its functions. In other words, nobody controls or owns TATA Coin.

7

Liquidity Assets Locked

Investors are the sole owners of the assets in the liquidity pool, to make Tata Coin a 100% secure digital currency, The LP tokens have been locked forever.

No Developer Wallet

Tata Coin is a 100% community-driven Digital Currency because the entire supply is in the hands of the Community, Tata Coin does not have a developer's wallet that has supplies.

No Control over Supply

The complete supply of TATA Coin has been allocated for its community and liquidity pool.

No Control over Liquidity Pool

No one can influence the price except TATA Coin's community because no one owns the supply other than its community and LP tokens have been also locked forever.

Smart Contract Audited & Renounced

Tata Coin's smart contract is audited and the ownership has been renounced, all the functions in Tata Coin's contract are designed to make Tata Coin 100% the most secure digital currency.

Ultra-low processing fee

TATA Coin brings sound money to the world, Merchants and users are empowered with low fee.

TATA Coin's above-described core features make it both a long-term store of value and a highly effective medium of exchange.

TATA COIN ECOSYSTEM

What is TATA Coin used for?

Thanks to its low transaction fees and fast confirmation times, there will be a growing number of use cases for TATA Coin. These range from games that integrate TATA Coin payments, to social networks and publishing platforms that allow you to tip using TATA Coin.

There are several use cases of TATA Coin, but we will focus on some of the financial-related cases.

INTERNATIONAL PAYMENTS

TATA Coin can make international payments faster and cheaper. Since TATA Coin is not issued by a central authority and is effectively borderless, you can bypass the several intermediaries needed to process the transaction. Transactions can happen on the same day safely and securely without any verifications by any central authorities, Banks, etc.

ALTERNATIVE BANKING AND WORLDWIDE PAYMENTS

A decentralized financial system democratizes finance and gives the unbanked access to services that a traditional financial institution would deny based on existing standards. In emerging markets, those outside the banking ecosystem are using mobile phones to access cryptocurrencies, as it's a viable alternative to a bank account and a way to protect their money from hyperinflation.

INVESTMENTS

TATA Coin has a limited and finite supply of coins, giving it the ability to keep inflation low. This stipulation encourages some retail and institutional investors to view TATA Coin as a store of value and invest in it as a form of "digital gold."

LONG-TERM STORE OF VALUE

The total supply of TATA Coin will never exceed 9 million coins. This is written into the code that defines the TATA Coin protocol.

As a decentralized network, TATA Coin users ultimately decide how the protocol evolves - and since it is not in the interests of participants to dilute their holdings by changing the protocol, the 9-million-coin limit will almost certainly remain in place forever.

TATA Coin's 'set-in-stone' supply schedule makes it unique among hard assets. By comparison, the supply of gold, although limited, is nevertheless subject to the forces of supply and demand. As the price of gold rises, more gold miners are incentivized to search for gold. This leads to an increase in the supply of gold, which places downward pressure on the price.

HIGHLY EFFECTIVE MEDIUM OF EXCHANGE

TATA Coin enables peer-to-peer payments between individuals - just like cash, but in the digital realm. Critically, fees for sending TATA Coin typically amount to less than a penny per transaction, and settlement occurs near-instantly, regardless of the physical location of participants. This makes TATA Coin useful for not only remittances and cross-border trade, but also for daily transactions like buying groceries. Since the fees and transaction times are so low, TATA Coin is also effective for micro-transaction use cases like tipping content creators and rewarding app users.

TATA (DAPP & DEX) DECENTRALIZED EXCHANGE

In the future, we will build a decentralized swap (DAPP) and exchange (DEX), where TATA Coin will be used as one of the key base assets as well as gas to be spent.

TOKENOMICS
